

Subject: Strategic Sustainability Insights for Customer-Facing Campaigns (Memo Attached)

Dear Marketing Team,

Please find attached a one-page memorandum detailing the strategic, customer-centric insights extracted from the IHH Healthcare 2024 Sustainability Report.

To support your objective of promoting IHH's sustainability progress to our customers, this memo deliberately excludes internal operational metrics. Instead, it highlights high-impact achievements designed to elevate brand prestige and influence consumer purchasing behaviour.

As detailed in the attachment, the key proof points are categorised into four strategic pillars for your upcoming omni-channel campaigns:

- **Patient Experience & Clinical Excellence:** Empowering over 8 million patients via digital medical records platforms and integrating AI-driven precision diagnostics (Annalise.ai and SmartPeep).
- **Community Impact & Social Responsibility:** Sponsoring advanced cancer treatments for 946 patients through the Life Renewed Programme and conducting over 3.1 million preventive health screenings.
- **Environmental Stewardship:** Introducing Malaysia's first electric motorcycle ambulance and eliminating over 90% of single-use virgin plastics across core operations.
- **Global Accolades:** Securing prestigious third-party recognitions from TIME and Forbes to affirm our corporate excellence.

I highly recommend integrating these narratives to distinctively position IHH as the world's most trusted, sustainable healthcare network. Should you require further data or detailed case studies for specific marketing collateral, please let me know.

Best regards,

Kendron Koay
