

MEMORANDUM

TO: Marketing Department
FROM: Business Analysis Team
DATE: 7 October 2026
SUBJECT: Strategic Sustainability Insights for Customer-Facing Campaigns (2024 Report)

Executive Summary

This memorandum distills the IHH Healthcare 2024 Sustainability Report into actionable, customer-centric insights. In alignment with international marketing best practices, internal operational metrics have been excluded. The focus is directed towards high-impact achievements in patient care, community health, and environmental stewardship to elevate brand prestige and influence consumer purchasing behaviour.

1. Elevating Patient Experience and Clinical Excellence

We can build brand trust by highlighting our technological integration and patient empowerment:

- **Digital Empowerment:** Over 8 million patients are now empowered to manage their healthcare journeys seamlessly through our online medical records platforms.
- **AI-Driven Precision:** We have successfully integrated artificial intelligence for superior diagnostics, including Annalise.ai for rapid X-ray analysis and SmartPeep video analytics to proactively prevent patient falls.

2. Tangible Community Impact and Social Responsibility

Demonstrating our commitment to public health strongly resonates with socially conscious consumers:

- **Life Renewed Programme:** We fully sponsored advanced radiotherapy and radiosurgery for 946 cancer patients from government hospitals, actively reducing the national disease burden.
- **Preventive Health Leadership:** Since 2022, we have conducted over 3.1 million critical health and cancer screenings, reinforcing our position as proactive healthcare partners.

3. Pioneering Environmental Stewardship

Showcasing tangible green initiatives positions IHH as an industry pioneer:

- **Green Emergency Transport:** Prince Court Medical Centre introduced Malaysia's first electric motorcycle ambulance, significantly cutting carbon emissions while expediting emergency response times in congested areas.
- **Aggressive Plastic Reduction:** We successfully eliminated over 90% of single-use virgin plastics in non-clinical areas across core operations in Malaysia, Singapore, Hong Kong, and Türkiye.

4. Prestigious Global Accolades

Third-party validations provide the ultimate proof points for campaign collateral:

- Recognised globally in TIME's "World's Best Companies 2024" and Forbes' "World's Best Employers 2024", affirming our global corporate excellence.

Strategic Recommendation

It is recommended that the Marketing Department integrates these pillars—Innovation, Community, Environment, and Prestige—into upcoming omni-channel campaigns to distinctively position IHH as the world's most trusted, sustainable healthcare network.
