

IHH Healthcare: Company Primer

Welcome to the team! Welcome to the team! An Introduction to Your New Journey

We are absolutely thrilled to welcome you to IHH Healthcare. As a new executive joining our dynamic network, you are stepping into a global family of over 70,000 dedicated professionals. Our organisation operates over 80 hospitals across 10 countries, including our core markets in Malaysia, Singapore, India, and Türkiye. Whether you are walking the halls of Pantai, Gleneagles, Prince Court, or Acıbadem, you are now part of Asia's largest hospital operator by market value.

Starting a new career journey is an exciting milestone. We designed this Company Primer specifically for you—our new recruits and future leaders. Your fresh perspectives and digital fluency are exactly what we need as we navigate the modern healthcare landscape. This document will serve as your foundational compass, providing absolute clarity on who we are, what we stand for, and the incredible impact you will help us achieve.

At IHH Healthcare, our aspiration is simple yet profound: “Care. For Good.” This ethos influences how we treat our patients, how we protect our planet, how we serve the public, and most importantly, how we care for you—our people. Please read through this primer to familiarise yourself with our core values, our 2024 strategic milestones, and the extensive support systems we have in place.

1. Who We Are: Our Identity and Values

To ensure we are all moving in the same direction, our daily operations and long-term strategic initiatives are firmly anchored by our foundational identity.

- **Our Purpose:** Touching Lives. Transforming Care.
- **Our Vision:** To be the world's most trusted healthcare services network.
- **Our Mission:** To take exemplary care of our patients, anchored around our people who strive to continuously raise the bar in clinical, operational, and service excellence.

Our Core Values

Our values are the DNA of our workplace culture. We encourage you to embody these every single day:

- **Patients First:** We put patients' needs first, ensuring every decision benefits those under our care.

- **Integrity:** We do the right thing, driven by strong corporate governance and unwavering ethics.
- **Empathy:** We listen with our hearts. Compassion is at the absolute core of true healthcare.
- **Teamwork:** We are better together. Collaboration across departments and borders drives our success.
- **Excellence:** We champion continuous improvement and innovation, seeking better ways to deliver care.

2. The “Care. For Good.” Sustainability Framework

Sustainability at IHH Healthcare is not merely a corporate buzzword; it is an intrinsic part of our business strategy. Our commitment to the Hippocratic principle of “doing no harm” extends beyond our patients to encompass the environment and the communities in which we operate. We recognise that the health of our planet and society directly impacts human health.

Our comprehensive sustainability framework is built upon four robust pillars, underpinned by strong governance:

- **People:** Shaping the best place to work by prioritising employee well-being, diversity, and talent development.
- **Patients:** Empowering our patients through evidence-based, safe, value-driven, and transparent care.
- **Public:** Nurturing a healthier society by tackling global health issues and driving corporate responsibility.
- **Planet:** Protecting our home for generations to come by minimising our environmental footprint and building climate resilience.

Robust governance with clear accountability and ethical conduct keeps us on track. Through strict adherence to our Code of Conduct, Anti-Bribery and Corruption Policy, and our confidential whistleblowing platform, EthicsPoint, we foster a safe, transparent environment. In 2024, 89% of our employees successfully completed rigorous anti-corruption training.

3. Our People Strategy: Shaping the Best Place to Work

We firmly believe that our people are the heartbeat of our organisation. You are integral to the high standards of care we provide, and we are deeply committed to creating a workplace where your growth, well-being, and unique contributions are valued. Our ambition is to be the employer of choice within the private healthcare sector by 2025.

Total Well-Being and Mental Health

We embrace a holistic approach to your health, aligned with the World Health Organization's Well-Being Index. This comprehensive model addresses Physical, Mental, Emotional, Recovery, and Purpose-driven well-being.

We recognise the high-pressure environment of the healthcare industry, making your mental well-being paramount. In 2024, our Employee Engagement Survey (EES) revealed that our psychological safety scores are 5% above global healthcare benchmarks. We want you to feel safe speaking up, sharing ideas, and bringing your authentic self to work without fear of judgement.

To further support this, we partnered with Intellect, an end-to-end digital mental health platform, offering free, comprehensive mental health resources and counselling to over 24,000 employees. Furthermore, in 2024, we launched the Mental Health First Aid (MHFA) Programme, successfully certifying over 202 leaders and managers as Mental Health First Aiders. These individuals are actively equipped to identify early signs of mental health challenges and provide empathetic support to colleagues. Demonstrating our top-down commitment, our Group CEO, Dr Prem Kumar Nair, was honoured with the Wellbeing CEO Award at the WorkWell Leaders Awards 2024.

Workplace Health and Safety (WSH)

We operate on the fundamental belief that all workplace injuries are preventable. Through the implementation of our unified clinical risk assurance framework and comprehensive training, we actively mitigate hazards.

- In 2024, nearly 40,000 employees were trained extensively on health and safety standards.
- We proudly reported zero workplace-related fatalities, reflecting our uncompromising stance on physical safety.
- We introduced targeted initiatives, such as Root Cause Analysis (RCA) training for safety advocates, to better identify underlying factors in safety incidents and continuously refine our protocols.

Diversity, Equity, and Inclusion (DEI)

Diversity is not just a metric; it is our strength. A diverse workforce allows us to provide culturally empathetic and highly nuanced care to our equally diverse patient populations. We focus our DEI efforts across five dimensions: Gender, Generational, Differently Abled, Skillset, and Cultural.

- **Women in Leadership:** We have made significant strides towards our 2025 goal of 50:50 gender parity in leadership. As of 2024, an impressive 49% of leadership roles across IHH Healthcare are held by women.
- **Inclusive Employment Practices:** We champion inclusive hiring across our global network. For instance, in Singapore, we are the first healthcare organisation to train and hire individuals on the autism spectrum for healthcare roles.
- **Fair Labour Standards:** We strictly adhere to fair wage practices globally and support the right to freedom of association. Our Global Responsible Sourcing Policy ensures our supply chain partners adhere to stringent human rights standards.

Talent Development and Continuous Learning

We are passionate about giving you the tools, training, and continuous learning opportunities to shape the future of our organisation. When you grow, IHH Healthcare grows. In 2024 alone, our workforce completed over 1.2 million training hours.

We have heavily invested in award-winning programmes to nurture our internal talent pipeline. At the 2024 Brandon Hall Group Excellence Awards, our leadership initiatives received four prestigious accolades, including Gold for Best Unique or Innovative Leadership Programme.

- **I.GLOBE:** Our flagship programme designed to strengthen business capabilities and mindsets for our enterprise and hospital leaders.
- **I.ELEVATE:** Newly launched in 2024, this programme prepares future leaders to navigate the dynamic healthcare industry with empathy, sharp decision-making skills, and an ecosystem-building mindset.
- **I.LEAD & I.SHINE:** Specialised programmes dedicated to cultivating management capabilities and future-ready mindsets in our nursing leaders.
- **Project Nightingale:** A comprehensive, data-driven talent management programme encompassing the entire nursing lifecycle to attract, engage, retain, and promote internal talent. This initiative successfully drove a 14% increase in our nursing talent pool in 2024.

4. Protecting Our Planet: Environmental Stewardship

The climate crisis is a health crisis. As one of the largest healthcare providers globally, we recognise that hospitals operate 24/7 and have an energy demand approximately 2.5 times higher than standard commercial buildings. We take our environmental stewardship profoundly seriously, targeting Net-Zero emissions by 2050, and capping our Scope 1 and 2 carbon growth by 2025.

Emissions and Energy Management

We are actively decarbonising our operations through innovative infrastructure upgrades and changes in clinical practice.

- **Tackling Anaesthetic Gases:** Desflurane is an anaesthetic gas with a global warming potential 2,500 times worse than carbon dioxide. Through rigorous clinical engagement, our core markets achieved a remarkable reduction of up to 55% in desflurane usage in 2024, substituting it with greener alternatives without compromising patient safety.
- **Energy Efficiency:** We are upgrading chiller systems across Malaysia, Singapore, and India to advanced magnetic-bearing centrifuge chillers, which are up to 30% more energy-efficient. In Hong Kong, AI technology optimised energy use, saving 459,196 kWh in 2024.
- **Transitioning to Renewables:** We signed a contract for a large-scale solar farm in Türkiye, expected to operationalise in 2025 and supply up to 80% of our local energy needs. In Malaysia, rooftop solar systems have been installed across 10 hospitals, with further expansion underway.
- **Green Transport:** Prince Court Medical Centre in Kuala Lumpur launched Malaysia's first electric motorcycle ambulance in 2024, reducing carbon emissions while improving emergency response times in congested urban areas.

Waste and Water Management

Sustainable waste and water management is essential for protecting public health. Following successful pilot programmes in 2023, we expanded our efforts globally in 2024.

- **Single-Use Plastics:** We achieved an over 90% reduction in single-use virgin plastics in non-clinical areas across our operations in Türkiye and Hong Kong, mirroring our earlier successes in Malaysia and Singapore.
- **Clinical Waste Reduction:** In selected Malaysian hospitals, we piloted modified Contact Precautions for healthcare workers caring for specific antibiotic-resistant cases. By relying on robust horizontal infection prevention measures, we reduced the usage of single-use isolation gowns by over 60% in piloted wards.
- **Circular Economy:** Gleneagles HealthCity Chennai partnered with waste vendors to optimise food management, reducing food production waste from 26% to 10% and repurposing remaining waste through composting.

Climate Resilience

We are proactively conducting climate scenario analyses to identify vulnerabilities to acute physical risks (e.g., floods, heatwaves) and transition risks. Our newly launched Global Responsible Sourcing Policy ensures our supply chain partners share our commitment to climate-conscious and ethical practices, securing operational continuity amidst global disruptions.

5. Empowering Our Patients & Nurturing the Public

Your work directly contributes to our broader mission of improving health outcomes globally.

Patient Care and Digital Innovation

- **Value-Driven Outcomes (VDO):** We track 202 quality indicators to ensure patients receive the best possible medical outcomes relative to cost. In 2024, we proudly maintained an outcome percentage of 91.7%, well above international benchmarks.
- **Digital Accessibility:** Over 8 million patients now have access to their medical records online via our proprietary apps, including MyHealth360, Acıbadem Online, and SmartHealth.
- **AI-Powered Diagnostics:** We are integrating artificial intelligence to revolutionise diagnostic speed and accuracy. We use Annalise.ai to automatically detect up to 124 abnormalities in chest X-rays in under 20 seconds. Through strategic investments in startups like Belun Technology (AI-powered sleep apnea detection) and SmartPeep (AI video analytics for fall prevention), we are setting new standards in proactive patient monitoring.

Tackling Global Health Issues

- **Antimicrobial Stewardship (AMS):** Antimicrobial Resistance (AMR) is dubbed a 'silent pandemic' by the WHO. In 2024, IHH Healthcare became the first private hospital network in Asia to fully implement AMR interventions in line with CDC guidelines across all our hospitals.
- **Reducing Disease Burden:** We focus on early detection of the world's leading causes of death: cancer and cardiovascular diseases. Since 2022, we have conducted over 3.1 million health and cancer screenings globally. Campaigns like 'Act Sooner, Live Better' in Malaysia empower the public to take charge of their health.

Corporate Responsibility: The Life Renewed Programme

Since 2012, our flagship Life Renewed programme has focused on providing quality healthcare to underserved populations. In Malaysia, through a renewed Memorandum of Understanding with the Ministry of Health, we have fully sponsored advanced radiotherapy and radiosurgery treatments for 946 underserved cancer patients in government hospitals since 2022. In Singapore, we partner with Para Athletics Singapore (PAS), providing complimentary holistic healthcare services to support national para-athletes.

Stepping Up in Times of Need

Our size and scale allow us to act swiftly during humanitarian crises. Following the devastating 2023 Türkiye-Syria earthquake, we constructed the 'Solidarity Quarter'—a 260-house container

city complete with healthcare, dining, and educational facilities, which continued to support displaced victims throughout 2024. Domestically, in December 2024, IHH Healthcare contributed RM 1 million to the Malaysian Red Crescent Society and MERCY Malaysia for extensive flood relief efforts.

6. Conclusion: Your Journey Begins Here

As you reach the end of this primer, we hope you feel a profound sense of pride in the organisation you have chosen to join. IHH Healthcare is far more than a workplace; it is a global community of driven, empathetic individuals striving to leave a lasting, positive mark on the world.

Whether you are spearheading a new digital health project, participating in our leadership development programmes, or volunteering in our community outreach, remember that your contributions actively shape the future of healthcare. You are now a crucial part of our journey towards clinical excellence, environmental sustainability, and unparalleled patient care.

We encourage you to embrace our core values, utilise the vast resources at your disposal, and grow with us. Once again, welcome to IHH Healthcare. Let us Care. For Good. together.
